I KNOW WHAT I SAW

James Fox, former Arizona Governor Fife Symington, Air France pilot Jean Charles Duboc

Stephenville Texas, film crew with UFO witness

National Press Club, Washington DC, James Fox introducing panelists

Guaranteed to change the way we see the universe, this compelling documentary follows renowned filmmaker and UFO researcher James Fox (*Out of the Blue*) on his mission to break through government secrecy and uncover the startling truth behind UFO sightings.

In a unique gathering at the National Press Club in Washington DC, Fox assembled the most credible witnesses from seven countries as Air Force Generals, astronauts, military and commercial pilots and government officials came together to present testimonies that, as Former Governor Fife Symington from Arizona stated, "...will challenge your reality."

Their accounts reveal shocking proof of a behind-the-scenes government operation that has, for decades, confiscated and hoarded substantiating evidence of close encounters with seemingly extra-terrestrial beings and craft. Those involved at the highest levels expose the reasons behind government secrecy in a cover-up extending so far, that even presidents have failed to obtain straight answers.

On his determined quest to seek out the truth, James Fox has gained the backing of a range of key media. He has made numerous television and radio appearances, including Larry King Live (CNN), Anderson Cooper 360° (CNN), ABC Nightline and Dateline NBC. Larry Landsman (The Roswell Crash: Startling New Evidence) said of the documentary, "...truly one of the most credible films on UFOs I've ever seen." His findings have also attracted support from government and military personnel. Former Governor Symington added, "...a laser beam focus ... presents an undeniable body of evidence which will turn the biggest skeptics into believers," and Edgar Mitchell, Apollo 14 astronaut said, "The most compelling film on the subject to date."

Featuring unique video footage and photographic evidence, alongside astonishing first-hand accounts, this enthralling documentary taps into the unrelenting global UFO fascination, debunking the myths, the theories and the cover-ups to discover what really might be "out there"...
